Pia Cassone (communications)

Carolina Reyes (teaching coordination)

What this course is about

Why

We usually present finished, revised work with a well-deserved smile on our lips. But the truth is, behind those results, there are also many hours when a smile was not the expression on our faces.

Know ourselves, understand what works for us

Share with other people!

Also: everyone goes through similar problems

4 areas

Motivation, sense of what research/writing work constitutes

Planning, systems for work

Relationship with being blocked, limiting beliefs

Role of our body in writing, thinking and research

How

6 sessions, exercises + discussion

1 additional session, generative AI

Important: always use the same notebook!

Where does this come from?
